

A BETTER
WORLD WITH SPL

Towards a Sustainable Future

SUPREME PETROCHEM LTD

Meeting standards, often surpassing them

On virtually every count, and in every aspect of its operations, SPL has set exceedingly high standards for itself, which is why it not just matches or complies with every international benchmark, it often also surpasses it.

For Quality Management, the company has been certified with ISO 9001 : 2015 (Third Edition) accreditation by BVC. For Environment Management, it has received ISO 14001 : 2015 from BVC.

Also from BVC, has come the ISO 45001 : 2018 certification for Occupational Health & Safety Management. The British Safety Council bestowed upon SPL its prestigious 5 Star rating.

Coming to products, several PS grades manufactured by SPL have been given UL-94 rating.

Likewise, several products of SPL meet IEC-65 rating of European Union for electrical & electronic applications.

A large number of SPL's products comply with USFDA and European Union requirements for food contact applications. It has also received approval from CFTRI for food packaging applications and RoHS compliant.

Versatile, holistic concern

SPL is a signatory to the "Responsible Care[®]" Initiative in India, one of the few Indian companies to participate in this effort.

For its relentless and all-round pursuit of safety, SPL has been bestowed with numerous national and state level awards.

In the area of eco-friendliness, multiple Greentech Environment Excellence Awards have come the company's way. In fact, this desire to protect and nurture the environment is reflected in the many 'green' practices that SPL follows diligently.

For instance, it has planted a large number of trees at and around its production facilities. It continually seeks to reduce energy consumption, and generation of waste, at every opportunity. In its manufacturing operations, it specifically uses non-ozone depleting gases as blowing agents. And as a rule, all used water at the plants is fully recycled for purposes like horticulture. SPL is also regularly involved with diverse social welfare schemes. As a responsible corporate citizen, it believes it must give back to the society it thrives in.

**A BETTER
WORLD WITH SPL**

Achieving more, by partnering the environment

Supreme Petrochem Ltd (SPL) is a company that is working to excel in its chosen area of business. At the same time, it stands committed to larger national objectives, and seeks to contribute to infrastructure development and environment conservation.

Being a world class manufacturer of Polystyrene and Expandable Polystyrene, as well as the largest in India, SPL continues to demonstrate undisputed leadership in everything from product quality to range, research to customization, exports to market share. But it believes that the ultimate benchmark of success is in developing such products that offer optimal efficiency at minimal ecological cost.

It is this focus that is reflected in SPL's many innovations such as: energy saving products like XPS that can insulate buildings so effectively, it can save power by 25%; cost reducing products like EPS, that helps create lightweight concrete which lowers construction material costs by 30%; Or in products that diminish our carbon footprint substantially.

SPL has partnered with ICPE (Indian Centre for Plastics in the Environment) to work with NGOs / customers and General Public to create awareness about collection and responsible recycling of Post consumer EPS waste.

Born to lead

Supreme Petrochem Ltd (SPL) has been promoted jointly by The Supreme Industries Ltd, and the established, highly diversified Rajan Raheja Group.

The former is among India's largest plastic processors and an acknowledged leader of the industry, with 28 advanced plants that manufacture the country's most comprehensive plastic products portfolio. The latter is a well established, highly diversified group with interests in cement, ceramic tiles, automotive batteries, construction, retail superstores, and more.

Their alliance has resulted in India's first & only international scale Styrenics complex at Amdoshi (Nagothane), 120 km from Mumbai.

The imposing 333 acres facility features a fully automated DCS plant, with technology from erstwhile Huntsman Chemical Corporation, USA. ABB Lummus Crest has provided basic engineering consultancy for the project. Our other works at Manali (Chennai) spread over 14 acre area manufactures Standard and FR EPS grades and is using DCS like our Amdoshi facility.

Growth, by design

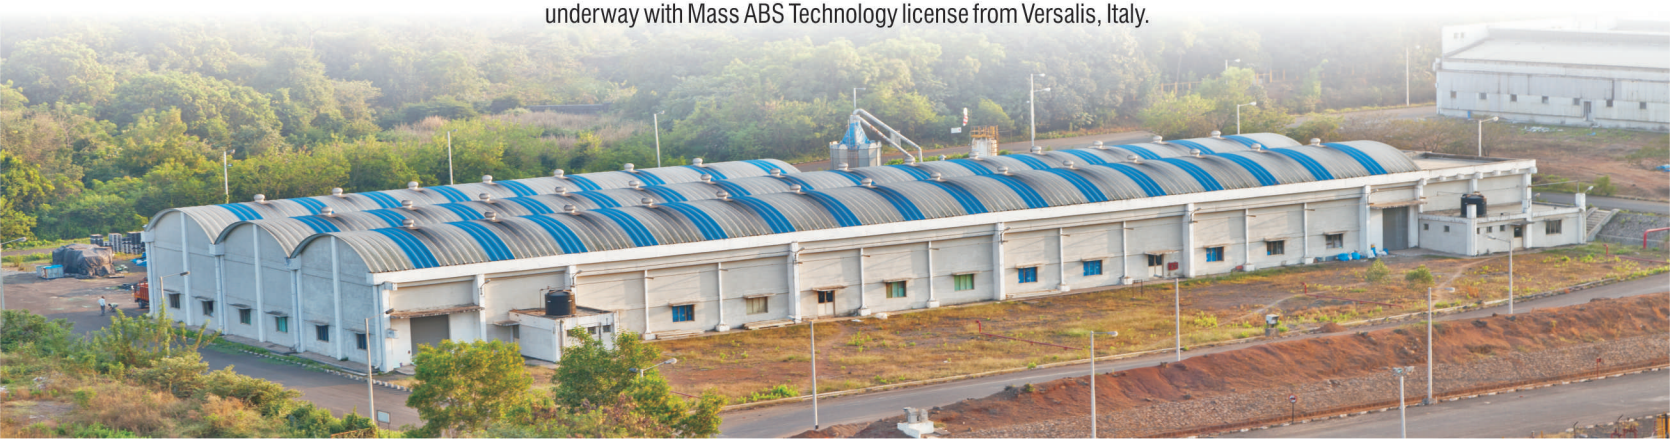

Beginning with a modest capacity of 66,000 TPA of Polystyrene in 1995, SPL has grown impressively in size, stature and scale of operations.

The current capacity stands at a formidable 4,35,000 TPA and has expansion plans to expand the capacity upto 7,00,000 TPA by 2025. And it has become the undisputed leader not only in the Indian Polystyrene market, but also the largest EPS producer in India.

From being a mere commodity player, SPL has now also become a reputed and trusted source for a wide range of value-added products. At the same time, it has considerably enhanced its capabilities of customization, so that it can also offer tailor - made products to meet a client's unique requirements.

Successful exports to more than 100 countries, across five continents, testify to SPL's excellence and caliber.

Along with PS, the company has demonstrated growth in the allied styrenics segment as well. Through acquisition of an existing facility in Chennai and by installing a new EPS plant at Amdoshi (Nagothane), the total EPS production capacity has climbed to 1,00,000 TPA. SPL has established India's first foam Extruded PS (XPS) insulation board plant, with a capacity of 1,00,000 cubic metres per annum. Installed capacity of Compounds and Masterbatches is 45,000 MTA, expandable to 1,00,000 MTA by 2025. SPL has plans to enter into ABS Business with a capacity of 140 KTA. The first line of 70 KTA is underway with Mass ABS Technology license from Versalis, Italy.

SUPREME

Comprehensive Product Range

- CRYSTAL POLYSTYRENE
- HIGH IMPACT POLYSTYRENE
- EXPANDABLE POLYSTYRENE (STANDARD AND FR GRADES)
- PS COMPOUNDS
- ABS COMPOUNDS
- SMMA COMPOUNDS
- PP COMPOUNDS
- NYLON COMPOUNDS
- FULL RANGE OF FR GRADES IN PS/ABS/PP/NYLON ETC
- WHITE MASTERBATCH
- BLACK MASTERBATCH
- COLOUR MASTERBATCH
- ADDITIVE MASTERBATCH
- EXTRUDED POLYSTYRENE (XPS)
